

Data Logger SDL-3

Your companion for long-term temperature and humidity monitoring.

Engineered with cutting-edge technology, our data logger redefines convenience and efficiency in environmental monitoring, offering instant insights without the need for additional software.

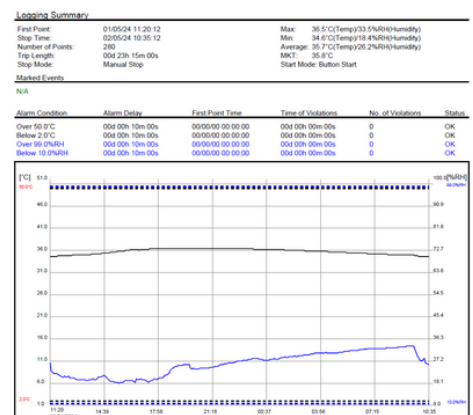

Useful for: **Food and Beverage Industry, Pharmaceutical Warehouses, HVAC System Monitoring, Museum and Archive Preservation, Agricultural Monitoring, Data Center Management and many more...**

Note: Temperature and RH may vary at different locations in a large room. The datalogger will provide readings of the point where it is placed.

4 Easy Steps!

1) Press for 3s to Start Recording

2) Press for 3s to Stop Recording

3) Plug USB into PC

4) Generate PDF report on your PC

Technical Specification	
Product	SUJAY Data Logger
Model	SDL-3
Temperature Scale	°C or °F
Accuracy	±3%RH; ±0.5°C (-20°C ~ +40°C), ±1.0°C (other range)
Operating Range	Temp: -30°C ~ 60°C; Humidity: 0%RH ~ 99%RH
Resolution	0.1
Memory Capacity	32,000
Log Interval	Programmable (10s ~ 18h) [Default: 10mins]
Alarm Range	Programmable high or low alarm limit for each channel
Shelf Life / Battery	Typically 1 year; CR2032 3.0V Lithium Battery (Depending on sampling rate and environment)
Report Generation	PDF and CSV
Communication Interface	USB 2.0
Weight	25 Grams

Features of PDF report generated on PC:

- Numeric Log of Timestamp, Temperature and RH
- Graph with temperature and humidity
- Alarm for out of bound ranges

Note: Due to continuous improvement, product looks and technical specifications may be updated at the discretion of SUJAY Inc.®
